Government of India

MESSAGE FROM THE DESK OF THE MEMBER

It is a privilege to serve as the Whole-time Member of the Dental Assessment and Rating Board (DARB), National Dental Commission, Government of India. The Board plays a pivotal role in strengthening quality, transparency, accountability, and continuous improvement in dental academics through effective assessment, accreditation, and regulatory frameworks.

My professional journey in dentistry, healthcare administration, and academic leadership spans more than three decades. After completing my BDS and MDS in Prosthodontics from King George's Medical College, Lucknow, I pursued master's degree in Hospital Administration and Business Administration, enabling me to combine clinical expertise with institutional governance and management.

Over the years, I have had the opportunity to serve in key leadership positions, including Vice Chancellor, Pro-Vice Chancellor, Director Principal, and Dean Academics. These roles have provided valuable experience in academic planning, curriculum development, faculty advancement, institutional growth, and quality assurance in dental academics and healthcare. As an academician and Prosthodontist, I have also remained actively engaged in teaching, research, and professional development, contributing to more than 225 scientific publications and participating in numerous national & international academic forums and community services.

Dental education is undergoing significant transformation, driven by advances in technology, evolving healthcare needs, and increasing expectations for quality and accountability. In this changing landscape, the Dental Assessment and Rating Board, NDC remains committed to fostering excellence through outcome-based education, evidence-driven assessment systems, and continuous quality enhancement.

Our collective goal is to build a future-ready dental education ecosystem that aligns with global standards while addressing the healthcare priorities of India. This requires collaboration among institutions, faculty, students, professional bodies, and regulators.

I remain committed to supporting initiatives that promote institutional excellence, innovation, high standards of patient care and service to the nation. Together, we can strengthen dental education and prepare competent, compassionate, and globally competitive dental professionals for the nation.

Warm Regards,

(Dr. Himanshu Aeran)
